PROFESSIONAL SUMMARY

Flutter Developer with **2+ years** of experience architecting production-ready Android and cross-platform applications for enterprise, IoT, and telecom ecosystems. Expert in **Flutter, Dart, Firebase, REST APIs, WebSockets, and state management solutions**, with additional experience in **Golang, Node.js, and AWS/Azure**. Delivered **30% faster development cycles** and **50% fewer production incidents** through CI/CD automation and proactive observability. Leverages **AI tools (Claude Code, GitHub Copilot)** to ship faster without compromising quality.

EXPERIENCE

Sunshine Iotronics LLP.

Software Developer

Nov 2024 - Present

Pune, India

- Architected and delivered **3+ production-grade Flutter applications** from concept to **Google Play Store release**, leveraging **state management, REST APIs, Firebase**, and USB CDC/BLE/Wi-Fi/UART communication for real-time data synchronization and **IoT device** monitoring.
- Architected and developed an **ERP monolithic platform** using **Node.js 24.x**, serving thousands of daily transactions, and integrated a **RAG-based AI assistant** using **Ollama, ChromaDB, and SQL** for intelligent document search and contextual information retrieval.
- Engineered an **websocket microservice** architecture using **Golang, Redis and Postgres**, enabling robust real-time event serialization and zero-downtime schema evolution.
- Developed scalable, reliable **firmware** for **telecom-grade** embedded systems, integrating sensors, real-time control, and industry communication protocols for high-uptime IoT hardware solutions.

OyeBusy Technologies Pvt.Ltd

Flutter Developer Intern

Dec 2023 - May 2024

Gurugram, India (Remote)

- Developed and shipped customer-facing features for a **production Flutter application**, contributing to an increase in Google Play Store rating from **3.5 to 4.1 stars**.
- Engineered and optimized **REST API** integrations, improving application performance, data consistency, and client-server communication efficiency.
- Participated in **Agile development cycles**, managing feature releases, production bug fixes, and Play Store deployments while maintaining application stability and quality.

TECHNICAL SKILLS

Mobile Development: Flutter, Android SDK, React Native, Dart, Kotlin, Jetpack Compose, Swift UI

State Management & Frameworks: GetX, Provider, Riverpod, BLOC

Backend Development: Node.js, Express.js, Golang, REST APIs, WebSockets

Cloud & Infrastructure: AWS, Microsoft Azure, Linux, Docker, Kubernetes

Databases: PostgreSQL, MySQL, MongoDB, DynamoDB, Firebase Firestore & Realtime DB

Programming Languages: Dart, Golang, JavaScript, TypeScript, Kotlin, Java, Python, C

Tools & CI/CD: Git, GitHub Actions, Postman.

AI & Development Tools: Claude Code, GitHub Copilot, Agentic Workflows, RAG, Prompt Engineering

Operating Systems: Linux, Windows

CERTIFICATIONS

Docker Essentials: A Developer Introduction | Cognitive Class (IBM) | [View Credential](#)

Jun 2026

OPEN SOURCE

Data Peek – [\[GitHub\]](#): UI contributions to a **cross-platform SQL client** (PostgreSQL, MySQL, MS SQL, SQLite) using **Electron, React, TypeScript, TanStack**.

EDUCATION

BE (Computer Science) , Government College of Engineering and Research, Avasari	2025 — 8.62 CGPA
Diploma in Computer Engineering, Cusrow Wadia Institute of Technology	2022 — 92.94%

PROJECTS

ERP System with RAG-based AI Assistant [\(Playstore Link\)](#)

Implemented **backend services and Flutter-based application features** for an ERP platform managing employee data, inventory, and operational workflows. Developed APIs for **real-time stock tracking, employee management, and reporting**. Integrated **RAG-based AI features** for intelligent document querying and contextual data retrieval. Built the RAG pipeline using **Node.js, Ollama, ChromaDB, SQL, and Flutter** for document processing, semantic search, and contextual AI response generation.

Io-Net (Cloud-connected IoT platform for smart device monitoring and control) [\(Playstore Link\)](#)

Developed a scalable IoT platform enabling **real-time monitoring, remote device control, scheduling automation, and multi-user device sharing**. Built secure device onboarding with PIN-based pairing and implemented backend services using **ExpressJS and MongoDB**. Designed an **automated credit deduction system** with atomic daily balance updates for reliable service management.

USB-Link (Flutter-based USB CDC monitoring and diagnostics tool) [\(Playstore Link\)](#)

Built a **Flutter application** for real-time communication with embedded devices using **USB CDC protocols**. Implemented features for live parameter monitoring, firmware configuration, alarm tracking, and hardware diagnostics. Added **Excel log export and telemetry reporting** for debugging, analytics, and operational monitoring.

DialTrack (Telecom analytics and automated call management platform) [\(GitHub Link\)](#)

Developed a **Flutter-based telecom analytics application** using **GetX and Firebase** for call log analysis and automated dialing workflows. Implemented insights for repeated callers, call duration trends, and activity breakdowns with interactive analytics dashboards. Added **CSV-based bulk call automation** for structured outreach workflows.
